SAVING FOOD DELICIOUSLY!

1/3 of the food is wasted. Many farmers, wholesalers, exporters and retailers deal with huge amount of food waste although their produce is still tasty and safe to eat.

What we do

On the other side, almost 800 million people in the world do not have enough food to live a healthy life. FoPo works on both sides of the food chain. We take the burden off farmers, exporters and manufacturers and collect their rejected or surplus food, dehydrate it with gentle drying methods and turn it into naturally good food powder with prolonged shelf-life.

FoPo Food Powder can then be used by end consumer in various delicious food applications and by humanitarian organizations as balanced/wholesome nutrition in concentrated form in severe conditions with poor access to fresh produce.
