THING TO DO

## WHO WE ARE

provide best housing experience that involves and improves the quality of life of the community while conserving african values in architecture.

## WHAT WE DO

We are a multidisciplinary team integrating local materials and innovative technologies into buildings to provide affordable housing services to the community

## VISION

Become a world leader in green and energy efficient buildings. Leading to a movement into the development of sustainable cities in Africa.

## MISSION AND GOALS

- Adaptable flexible model made of recycled net zero energy shipping containers.
- Assembly and disassembly in a record time compared to normal construction.
- Smart city concept introducing IOT technology.
- Fast scalability in cities.
- Powered by grid tied solar pv system.
- An aquaponics vegetation system inside the house reaching energy efficiency by using passive and active systems.
